MOONLIGHT BEACH WALKS

Saturday, December 4th and January 1st
7:30 – 9:30 PM at Seahurst Beach

Imagine you're on the shoreline at a lovely low tide. Rocks that are covered all year lie exposed to view while the sea denizens remain happily cold and wet in the dark. All around you, people waving flashlights are intently studying the amazing and abundant sea life as local naturalists help you discover the wonders of your Puget Sound shoreline.

BUNDLE UP AGAINST THE WEATHER AND BE SURE TO BRING: Bright flashlight with good batteries, warm hat and dry gloves, and wading boots (you'll be in ankle deep water).
